glass
D E C O R

Rivestimento formato dall'accoppiamento di stratifica tra cristallo trasparente sp.5mm, decoro e ceramica sp.3mm, per uno spessore totale di circa 9mm. Glass nasce grazie alla tecnologia di incollaggio sottovuoto e in temperatura con uno speciale sigillante posto tra la lastra di ceramica e quella di cristallo creando un unico elemento resistente all'umidità e agli agenti chimici, dalle finiture superficiali personalizzabili. Il rivestimento è disponibile nei 3 decori:

- CHERRY
- CALYPSO
- GARDEN

Ciascuno dei 3 decori è disponibile in piastrelle 100x100 cm.

Covering formed by the stratified match of a layer of 5mm transparent glass, a layer of decoration, and a layer of 3mm ceramic for a total thickness of around 9mm. Glass can be produced thanks to a technology that, with a process of high-temperature vacuum-sealing with a special sealant put between the ceramic and the glass sheets, creates a single element. This new element is resistant to moisture and chemical agents and has customized finishes. This covering is available in the following 3 decorations:

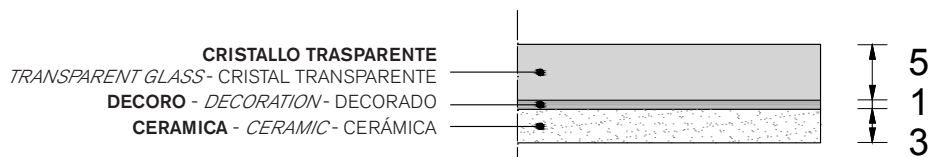

- CHERRY
- CALYPSO
- GARDEN

Each one of the three decorations is available in 100x100 cm tiles.

Revestimiento formado por el acoplamiento de estratificación entre cristal transparente grosor 5 mm, papel decorado y cerámica grosor 3 mm, con un grosor total de aproximadamente 9 mm. Glass nace gracias a la tecnología de encolaje en vacío y temperatura con una cola especial sellante colocada entre la lastra de cerámica y la de cristal creando un único elemento resistente a la humedad y a los agentes químicos, consiguiendo un acabado superficial personalizable. El revestimiento está disponible en 3 decorados:

- CHERRY
- CALYPSO
- GARDEN

Cada uno de los 3 decorados está disponible en baldosas 100 x 100 cm.

 MIRROR

Rivestimento formato dall'accoppiamento di stratifica tra specchio sp.5mm e ceramica sp.3 mm, per uno spessore totale di circa 9mm. Glass nasce grazie alla tecnologia di incollaggio sottovuoto e in temperatura con uno speciale sigillante posto tra la lastra di ceramica e quella di specchio creando un unico elemento resistente all'umidità e agli agenti chimici, dalle finiture superficiali personalizzabili. Il rivestimento finitura SPECCHIO 02 è disponibile nel formato 100x100cm e su misura.

Covering formed by the stratified match of a layer of 5mm mirror and a layer of 3mm ceramic for a total thickness of around 9mm. Glass can be produced thanks to a technology that, with a process of high-temperature vacuum-sealing with a special sealant put between the ceramic and the glass sheets, creates a single element. This new element is resistant to moisture and chemical agents. This covering in SPECCHIO 02 finish is available in tiles of 100x100 cm and in customized sizes.

Revestimiento formado por el acoplamiento de estratificación entre espejo grosor 5 mm y cerámica grosor 3 mm, con un grosor total de aproximadamente 9 mm. Glass nace gracias a la tecnología de encolaje en vacío y temperatura con una cola especial sellante colocada entre la lastra de cerámica y la de espejo creando un único elemento resistente a la humedad y a los agentes químicos, consiguiendo un acabado superficial personalizable. El revestimiento acabado ESPEJO 02 está disponible en el formato 100 x 100 cm o a medida.
